

IMPORTANT TERMS

Hallux Valgus: A condition where the big toe deviates outward towards the other toes, causing a bony prominence on the inner side of the foot.

Bunion: A bony bump that forms at the base of the big toe joint, often associated with hallux valgus.

Bunionectomy: Surgical removal or correction of a bunion.

Osteotomy: A surgical procedure in which a bone is cut and realigned to correct deformity or alter its length or alignment.

CPT 28292

Correction, hallux valgus with bunionectomy, with sesamoidectomy, when performed; with resection of proximal phalanx base, when performed, any method

CPT 28295

Correction, hallux valgus with bunionectomy, with sesamoidectomy, when performed; with PROXIMAL metatarsal osteotomy; any method

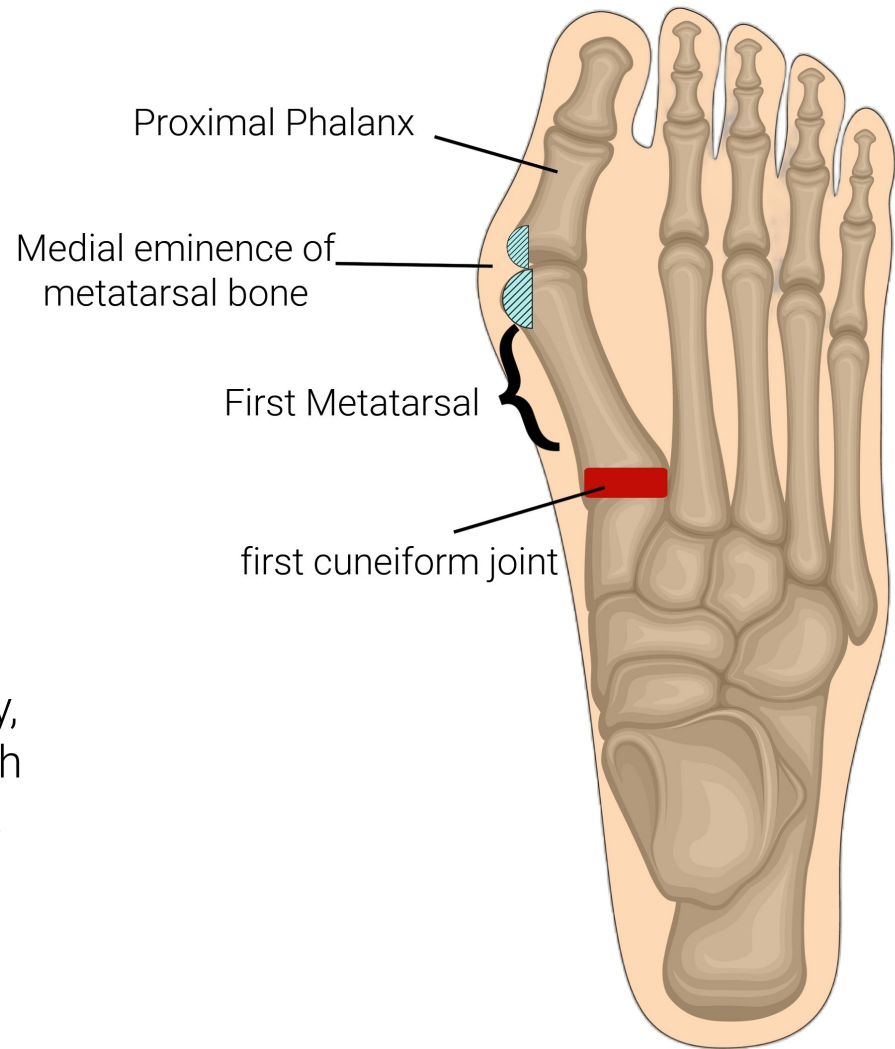

CPT 28296

Correction, hallux valgus with bunionectomy, with sesamoidectomy, when performed; with DISTAL metatarsal osteotomy; any method

CPT 28297

Correction, hallux valgus with bunionectomy, with sesamoidectomy, when performed; with first metatarsal and medial cuneiform joint arthrodesis; any method

CPT 28298

Correction, hallux valgus with bunionectomy, with sesamoidectomy, when performed; with proximal phalanx osteotomy, any method

CPT 28299

Correction, hallux valgus with bunionectomy,
with sesamoidectomy, when performed; with
double osteotomy, any method
